About Postmates

Postmates helps people unlock the best of their cities – and their lives, with an insanely reliable on-demand “anything” network. Launched in 2011, Postmates pioneered the on-demand delivery movement in the US by offering delivery from restaurants and stores previously only available offline. The company now operates in 2,940 US cities, as well as Mexico, and provides access to over 250,000 merchants.

While some companies try to build a warehouse and funnel goods into it - Postmates believes that our cities, our towns, our communities are our warehouses. Postmates is transforming the way food and merchandise is moved around cities - by connecting the best of a city to our customers, while helping local brick & mortar compete against retail goliaths.
